

Large-Scale Engineering Contracting

The company specializes in general contracting for large-scale engineering endeavors. International trade is a core component, focusing on the strategic placement of industrial machinery for both domestic and overseas projects.

Service Overview

Comprehensive Engineering Solutions

We specialize in the general contracting of large-scale engineering projects and international trade. Our expertise spans the full project lifecycle, from initial planning and investment analysis to construction and operational management. By leveraging strong partnerships with top-tier research institutes and financial institutions, we deliver sophisticated turn-key solutions tailored to diverse industrial needs.

Service Capabilities

Industry Sectors Served
