

Large-Scale Industrial Complex with Tower Blocks

This is a large-scale industrial complex featuring a central low-rise structure with multiple rectangular extensions and several high-rise tower blocks. The complex includes landscaped areas with trees and parking facilities.

Overview

Integrated Industrial Engineering Services

This large-scale industrial complex provides comprehensive engineering solutions, ranging from strategic planning and pre-project consulting to full-scale project management and contracting. The facility is designed to support diverse sectors, including heavy machinery, wind power, nuclear power, and chemical processing. With a strong foundation in mechanical industrial design, the complex integrates advanced engineering services with biological purification capabilities.

Core Services

Primary Business Areas

- Strategic planning consultation
- Pre-project consulting
- Project design
- Project management
- Project contracting

Industry Expertise

Served Industries

Heavy Machinery, Construction Machinery, Wind Power, Nuclear Power, Metallurgy, Coal, Shipping, Oil & Chemical

Technical Capabilities

Specialized Engineering

Biological Purify Engineering • Nondestructive Testing • Industrial Equipment Integration

Testing & Inspection Services

Service Category	Application
Nondestructive Testing	National Engineering Technology
Inspection Systems	Customs Anti-Smuggling
Detection Room Project	Industrial Enterprise
