

Laser Component for FX-1R Machinery

This laser component is designed for use in FX-1R series machinery. It is likely involved in precision positioning or inspection processes.

Product Overview

Precision Laser Component

This high-precision laser component is engineered specifically for use within the FX-1R machinery series. It serves as a critical element for maintaining the accuracy of positioning and inspection processes during operation. Designed with a protective casing, the unit ensures optimal alignment and safeguards sensitive internal optics against environmental contaminants like dust.

Technical Details

Key Features

- Precision positioning support
- Integrated inspection functionality
- Protective casing for optical alignment
- Dust-resistant design

Visible Markings

BEROPTICS

Part Number

E9611729000

Compatible Machinery

FX-1R Series
