

Laser Cutting and Engraving Machine for Garments and Shoes

This industrial machinery is designed for garment, shoes, and accessories manufacturing. It features a laser cutting and engraving system with a large working area.

Overview

Industrial Precision Laser System

This advanced laser cutting and engraving machine is specifically engineered for the garment, footwear, and accessories manufacturing industries. It combines high-precision cutting capabilities with versatile engraving options, housed within a secure, protective enclosure for operator safety. Mounted on a heavy-duty frame with integrated casters, this system offers both stability during operation and the flexibility needed for dynamic production environments.

Technical Specifications

Machine Type	Laser Cutting and Engraving System
Intended Applications	Garment Manufacturing, Shoe Production, Fashion Accessories

Design & Safety

Safety Features

- Protective enclosure
- Transparent viewing window
- Integrated control panel

Mobility	Yes
