

Laser Distance Meter with Bubble Level

This laser distance meter measures distances up to 40 meters. It includes a bubble level for accurate alignment and a digital display for easy reading.

Overview

Precision Distance Measurement

This professional-grade laser distance meter is designed for accurate and efficient measurement tasks. Featuring a built-in bubble level for precise alignment, it allows users to quickly calculate distance, area, and volume. The clear digital display ensures easy reading, while the intuitive button interface supports continuous measurement modes for versatile field use.
