

# Laser Distance Meter

This laser distance meter is a handheld electronic tool for accurate distance measurement. It emits a laser beam to a target, calculating distance based on the return time, and features a digital display and multiple functions for various measurements.

## Overview

### Professional Laser Distance Measurement

This handheld electronic laser distance meter provides precise measurements for construction, real estate, and professional DIY applications. It utilizes advanced laser technology to calculate distances, areas, and volumes with high accuracy. Featuring an intuitive digital display and simple operation, it is an essential tool for rapid and reliable site assessments.

## Technical Specifications

### Key Features

- Handheld ergonomic design
- Laser beam targeting
- Clear digital readout
- Easy-to-use interface

Measurement Modes	Distance, Area, Volume, Indirect Measurement
Power Source	Battery-powered
Display	Digital LCD
