Overview

High-Precision Laser Processing

This 1300 x 900 mm laser engraving machine is a versatile, high-precision tool engineered for demanding industrial and workshop environments. It features a robust, enclosed design with integrated safety systems, including an emergency stop and fume extraction, ensuring reliable operation across various materials. With its large work area and compatibility with standard design formats like DXF, AI, and PLT, it provides a powerful solution for sign making, acrylic cutting, and detailed wood engraving.

Technical Specifications

Work Area

1300 mm
Width

900 mm
Depth

Laser Source

CO2 Laser

Supported Materials

Wood, Acrylic, Leather, Textiles, Metal

Features & Safety

Safety & Operational Systems

- Enclosed laser chamber
- Emergency stop button
- Water cooling system
- Exhaust system for fume extraction

Software & File Formats

DXF • AI • PLT

Worktable

Honeycomb worktable
