

Laser Engraving Machine

This laser engraving machine is a precision tool for cutting and engraving various materials. It features a compact, fully enclosed cabinet for safety and is equipped with a digital control panel for parameter adjustments.

Overview

Precision Laser Engraving & Cutting

The LG6040 laser engraver is a precision machine tool engineered for versatile cutting and engraving tasks across various materials. Designed with a compact footprint, it features a fully enclosed cabinet that ensures both operator safety and effective dust control. This system is ideal for applications ranging from rapid prototyping to small-scale production, offering reliable efficiency for professional laser processing needs.

Technical Specifications

Model Number	LG6040
Construction	Fully enclosed cabinet

Features

Key Features

- Digital control panel for precise parameter adjustments
- Real-time monitoring capabilities
- Robust construction for stability
- Compact footprint design

Application

Intended Use	Prototyping, Small-scale production, Laser cutting, Laser engraving
