

Laser Marking Machine for Wood Cases

This is a specialized laser marking machine designed for engraving wooden cases. It features a computer-controlled system for precise design input and control.

Product Overview

Professional Wood Marking Solution

This specialized laser marking system is engineered specifically for the precision engraving of wooden cases. Equipped with an advanced cross-positioning red light system, it allows for effortless and accurate alignment of designs directly onto wooden surfaces. The integrated workstation provides full control over marking parameters, ensuring high-quality, repeatable results for various industrial wooden packaging applications.

Technical Specifications

Control System

- Integrated Computer
- Dedicated Monitor
- Keyboard and Mouse Interface

Control System	
Cooling System Model	CW-3000 Industrial Chiller
Positioning Technology	Cross Positioning, Red Light Alignment

Performance

Device Class

Laser Marking Machine • Wooden Case Engraver
