

# Laser Printer Cartridge

This is a printer cartridge used in laser printers. It transfers toner onto paper, creating the printed image.

## Product Overview

### Professional Laser Printer Component

This high-quality laser printer cartridge is engineered for consistent and reliable printing performance. Featuring a durable green cylindrical drum and a robust black plastic housing, this component is designed to facilitate the precise transfer of toner onto paper. It includes a protective cover to ensure the integrity of the drum unit during shipping and installation, making it an essential replacement part for maintaining optimal print quality.

## Technical Details

### Design Features

- Integrated green cylindrical drum
- Protective cover included
- Durable housing for laser printer compatibility

Component Type	Drum Unit / Toner Cartridge
Construction Materials	Black Plastic, Photosensitive Drum
