

Laser Welded Diamond Saw Blade for Concrete

This is a laser welded diamond saw blade engineered for cutting concrete. It is suitable for walk-behind saws and flat saws.

Product Overview

Professional Laser Welded Concrete Saw Blade

This high-performance diamond saw blade is engineered specifically for cutting cured concrete in demanding construction and demolition environments. Featuring advanced laser-welded technology, these blades provide superior segment retention and durability during intensive use. The product range covers a wide variety of diameters, ensuring compatibility with standard professional equipment for diverse project requirements.

Technical Specifications

Size and Dimension Matrix

Item No.	Diameter (mm)	Bore (mm)	Segment Thickness (mm)	Segment Height (mm)
CL300SM	300	25.4/1"	3.0	10/12
CL350SM	350	25.4/1"	3.2	10/12
CL400SM	400	25.4/1"	3.6	10/12
CL450SM	450	25.4/1"	3.8	10/12
CL500SM	500	25.4/1"	4.0	10/12
CL600SM	600	25.4/1"	4.5	10/12
CL650SM	650	25.4/1"	4.5	10/12
CL700SM	700	25.4/1"	4.5	10/12
CL750SM	750	25.4/1"	4.5	10/12
CL800SM	800	25.4/1"	4.5	10/12
CL900SM	900	25.4/1"	4.5-6.0	10/12
CL1000SM	1000	25.4/1"	5.5-6.5	10/12
CL1100SM	1100	25.4/1"	5.5-6.5	10/12
CL1200SM	1200	25.4/1"	5.5-7.0	10/12

Performance Features

Manufacturing Technology

Laser Welded

Recommended Application

Cured Concrete, Construction, Demolition
