

Latex Coated Abrasive Sanding Paper

Latex coated sanding paper is designed for various sanding applications. It features an open P320 coating, making it suitable for use with machine tools.

Product Overview

High-Performance Latex Sanding Paper

This premium coated abrasive paper features a 30% latex content base, providing exceptional flexibility and durability for both manual and machine sanding. Engineered with high-temperature resistant glue and specialized abrasives, it delivers superior performance on wood, furniture, and plastic surfaces. Its design ensures effective heat dissipation and anti-blockage properties, making it an ideal choice for professional polishing and grinding applications.

Technical Specifications

Sheet Dimensions	230 x 280 mm (9 x 11 inches)
Available Grit Range	P120 - P1200
Base Material	30% Latex Paper
Binder Type	High-Temperature Resistant Resin

Key Features

Primary Applications

- Woodworking
- Furniture Polishing
- Plastic Surface Grinding
- Mechanical Surface Finishing

Performance Features

Heat Dissipation, Blockage Proof, Flexible, High Temperature Resistant

Packaging & Logistics

Packaging Details

100 pcs
