

Laundry Basket Mould

Moulds designed for the production of various plastic laundry baskets. These moulds come in different shapes and sizes, suitable for manufacturing laundry baskets with diverse designs, including open weave patterns, solid walls with ventilation holes, and models with lids.

Product Overview

Professional Laundry Basket Moulding Solutions

These high-precision injection moulds are engineered specifically for the efficient production of various plastic laundry baskets. Designed to accommodate diverse aesthetic and functional requirements, they support the creation of open weave patterns, solid-walled designs with ventilation, and models featuring integrated lids. Each unit is built for consistent, high-quality output, ensuring the production of durable and reliable consumer goods.

Technical Specifications

Available Models

- laundry basket mould_375
- laundry basket mould_374
- laundry basket mould_373
- laundry basket mould_372
- laundry basket mould_371
- laundry basket mould_370

Design Features Supported

Open Weave Patterns, Ventilated Solid Walls, Lidded Models

Production Method

Plastic Injection Moulding
