

Laundry Washing and Drying Machine

This machine combines washing and drying functionality. It efficiently cleans and dries clothing in one unit.

Product Overview

Professional Laundry Solution

This combined laundry washing and drying machine is designed for efficient, space-saving operation in professional environments. It offers a robust cleaning and drying cycle suitable for high-volume requirements while maintaining gentle fabric care. The integrated system streamlines the workflow, ensuring laundry is handled from wash to dry with minimal intervention.

Technical Metrics

Performance Highlights

15 kg

Load Capacity

1400 RPM

Spin Speed

Key Operational Features

- Integrated washing and drying cycles
- Automated moisture sensing
- Energy-efficient heating elements
- Heavy-duty stainless steel drum

Certifications

Compliance & Quality

ISO 9001 • CE Certified • Energy Star Rated
