

Lawn and Garden Soil Compaction Roller

This garden lawn roller is designed for effectively compacting soil and leveling uneven surfaces. Featuring a durable steel drum construction, the roller ensures even distribution of weight for optimal compaction.

Product Overview

Professional Lawn and Garden Roller

This versatile soil compaction roller is an essential tool for maintaining pristine lawns and preparing garden seedbeds. Designed for durability and ease of use, it features a heavy-duty steel drum that can be filled with water or sand to achieve optimal compaction force for leveling uneven surfaces or smoothing newly laid sod. Its ergonomic design ensures comfortable maneuverability, making it a reliable helper for both farming and landscaping applications.

Technical Specifications

Drum Size	400 x 450 mm
Drum Material Thickness	1.8 mm
Scraper Bar Thickness	3 mm

Capacity & Performance

Fill Capacity

60 L

Water Capacity

72 kg

Water Weight

102 kg

Sand Capacity

Physical Dimensions

Body Dimensions	1230 x 580 x 400 mm
Handle Specifications	19 mm Diameter x 1.15 mm Thickness

Logistics

Packaging	1 pc per carton
40' HQ Container Load	585 pcs

Usage

Ideal Applications	Soil Compaction, Lawn Leveling, Seedbed Preparation, Gardening, Farming
