

# Lawn Roller for Soil Compaction

This lawn roller is a manually operated landscaping tool for leveling and compacting soil. It features a heavy roller drum that can be filled with water or sand to increase its weight.

## Product Overview

### Professional Soil Compaction Solution

The lawn roller is a versatile manual tool engineered for effective soil compaction, surface leveling, and lawn maintenance. Its robust design allows for variable weight adjustment, making it ideal for preparing seedbeds, smoothing uneven ground, and securing newly laid sod. This essential landscaping implement ensures a uniform, professional finish for residential and commercial outdoor spaces.

## Technical Specifications

### Compaction Capabilities

- Water-fillable drum
- Sand-fillable drum
- Adjustable weight capacity

Model Identifier	TI-021B
Operation	Manual push or pull

## Key Features

Primary Applications	Soil Compaction, Seedbed Preparation, Lawn Leveling, Sod Installation
----------------------	---

## Construction

### Drum Materials

Steel • Polyethylene
