

# Lawn Scarifier with Collection Box

This scarifier is a gardening tool used to remove thatch and dead moss from lawns, encouraging healthier grass. It features a collection box for efficient debris removal and an adjustable handle for comfortable use.

## Product Overview

### Professional Lawn Scarifier

This high-performance lawn scarifier is engineered to effectively remove thatch and dead moss, significantly promoting healthier and denser grass growth. Equipped with a powerful electric motor and five adjustable cutting heights, it offers precise control for varied lawn conditions. The unit includes a convenient 45-liter collection box for clean and efficient debris management, making it an ideal tool for both residential and commercial landscaping maintenance.
