

Lay Flat Water Discharge Hose

This lay flat hose is designed for efficient water discharge. It is constructed from durable polyethylene, and it offers resistance to abrasion, chemicals, and UV exposure.

Product Overview

Professional Lay Flat Hose Solution

This high-quality PE lay flat hose is engineered for efficient water discharge across various demanding environments. Designed with durability in mind, it features excellent resistance to abrasion, chemicals, and UV exposure, ensuring long-term reliability. Its lightweight and flexible construction allows for easy installation, storage, and transportation, making it an ideal choice for irrigation, construction, and industrial water transfer.

Key Features

Performance Characteristics

- Lightweight and flexible design
- Excellent cold and hot temperature resistance
- High Anti-UV protection
- Easy to install and store
- Durable construction

Technical Specifications

Irrigation Capacity

12 m

Max Irrigation Span

1300 m²

Coverage Area

Standard Length

100 m

Applications

Suitable Applications

Micro Irrigation, General Water Discharge, Farm Irrigation, Aquiculture, Construction Sites, Mining

Material & Build

Material

Polyethylene (PE)
