

LCD Connector for Saab 9-5 ACC Display

This flat LCD connector is designed for the Saab 9-5 ACC display. It provides a reliable electrical connection between the LCD screen and the control unit.

Product Overview

Restoration Component for ACC Displays

This flat LCD connector is a precision-engineered replacement component designed specifically for the Automatic Climate Control (ACC) display unit. It facilitates a reliable electrical connection between the LCD screen and the control unit, effectively resolving common display issues such as dimness or unreadable segments. This component offers a cost-effective solution for restoring the full functionality of the climate control interface.

Technical Details

Component Type	Flat LCD Connector
Primary Application	Automatic Climate Control (ACC) Display
Compatible Vehicle Model	Saab 9-5

Key Features

Key Benefits

- Restores display readability
- Ensures reliable electrical connectivity
- Cost-effective repair solution
- Precision-engineered design
