

LCD Display Module

This LCD display module presents visual information in electronic devices. It is suitable for showing data, graphics, and text in various applications.

Product Overview

High-Efficiency LED Illumination

This LED tube light module is engineered for versatile lighting applications across residential, commercial, and industrial environments. Featuring a linear array of high-quality LED chips enclosed in a durable housing, it provides consistent and bright illumination. Designed for easy installation and maintenance, this module offers a reliable solution for efficient lighting upgrades.

Technical Specifications

Light Source	Linear LED Array
Power Input	Low-voltage DC
Housing Material	Clear/Translucent

Applications

Suitable Environments	Residential, Commercial, Industrial
