

LCD Monitor Mainboard with Tuner

This LCD monitor mainboard is designed for use in LCD monitors. It is equipped with a central processing unit, HDMI, VGA, audio jacks, and a tuner module.

Product Overview

MST109 LCD Monitor Mainboard

The MST109 mainboard is a comprehensive control solution designed specifically for LCD monitors. It integrates a central processing unit with essential circuitry to manage display functions, video signal processing, and connectivity. With an onboard tuner module, this board enables television functionality, making it a versatile component for display manufacturing and repair.

Technical Features

Model Number	MST109
Primary Application	LCD Monitor

Connectivity

Available Input/Output Ports

- HDMI
- VGA
- Audio Jacks

Functionality

Integrated Features	Tuner Module, Video Signal Processing, Display Control
