

# LCD/LED Monitor Mainboard with Tuner

This mainboard is designed for LCD and LED monitors. It features multiple I/O ports such as USB and VGA, and includes a tuner for TV signal reception.

## Overview

### High-Performance Display Controller

This versatile mainboard is engineered for seamless integration into LCD and LED monitor chassis. It features robust signal processing capabilities, including an integrated tuner module for direct television signal reception. Designed for reliability and broad compatibility, this board provides essential connectivity and control functions for professional display applications.

## Technical Specifications

Model Identifier	MST106C-LF-21
Production Date Code	20160224

## Connectivity

Input/Output Interface	USB, VGA, Audio/Video Connectors
------------------------	----------------------------------

## Key Features

### Core Components

- Integrated TV Tuner Module
- Main Processor Unit
- Memory Modules
- Power Regulation Circuitry

### Application Compatibility

LCD Displays • LED Displays
