Product Overview

Versatile LED TV Driver Board

This maintenance board is specifically engineered for 15-24 inch LED television sets, offering a reliable solution for display control and signal processing. It integrates essential components for audio processing and power management, supporting resolutions up to 1920x1080 (Full HD). Designed for easy integration, it serves as a cost-effective choice for TV assembly and repair.

Technical Specifications

Supported Screen Sizes	15 to 24 inches
Maximum Resolution	1920x1080 (Full HD)
Model Identifiers	V2, T.R83.03, RR83.03C, DIP

Connectivity

Available Interfaces

- HDMI
- VGA
- USB
- Composite Video
- Audio Jacks

Connectivity Highlights

Multi-Interface • Signal Processing • Stable Power
