

Lead-Acid Battery Charger with Adjustable Rate

This AC battery charger is designed for various battery types and voltages. It includes an ammeter for monitoring charging current, adjustable charging rate, and multiple voltage settings for different battery configurations.

Product Overview

Versatile Lead-Acid Battery Charger

This professional-grade AC battery charger is engineered to support a variety of lead-acid battery configurations. Featuring an adjustable charging rate and multiple voltage settings, it provides flexible power delivery for diverse maintenance and charging needs. The unit includes integrated safety mechanisms like overload and reverse polarity protection, ensuring reliable operation in demanding environments.

Technical Specifications

Charging Performance

8 A 6V Charging Current	7 A 12V Charging Current	3.5 A 24V Charging Current
-----------------------------------	------------------------------------	--------------------------------------

Input Power	AC 220V, 50/60Hz
Phase	Single Phase

Features & Safety

Control Settings

- Adjustable Charging Rate
- Voltage Selection
- Switch Amps
- Stop/Off/On Control

Safety Protection	Overload Protection, Reverse Polarity Protection
Monitoring	Yes
