

Lead-Acid Car Battery

This lead-acid car battery provides reliable starting power for vehicles. It features a robust construction for durability and a maintenance-free design.

Overview

Reliable Starting Power

This lead-acid automotive battery is engineered to deliver consistent and reliable starting power for a wide range of vehicles. Designed with a robust construction, it ensures long-term durability and performance in demanding conditions. Its maintenance-free design offers significant convenience for users, while meeting or exceeding OEM standards for seamless compatibility.

Technical Specifications

Model Number	6-QA-60A
Capacity	60 Ah
Cold Cranking Amps (SAE)	480 A

Features

Maintenance Type	Maintenance-Free
Suitable Applications	Automotive, OEM Replacement
