

Lead-Acid Storage Battery

This is a lead-acid storage battery designed for energy storage. It is commonly used in automotive and industrial applications.

Product Overview

Professional Lead-Acid Storage Solution

This lead-acid storage battery is engineered for reliable performance in demanding automotive and industrial environments. Featuring a robust rectangular design, the unit is equipped with accessible electrolyte maintenance points and integrated handles for convenient handling and installation. Its durable construction ensures longevity, making it a dependable choice for power storage needs.

Physical Characteristics

Design & Build

- Rectangular form factor
- Blue top casing
- White or off-white body construction
- Integrated transport handles
- Accessible electrolyte caps

Application & Suitability

Suitable Applications

Automotive, Industrial
