

Leaf Chain for Lifting and Pulling

This leaf chain is designed for heavy-duty lifting and pulling applications. It is constructed from precision-engineered steel plates and pins for optimal durability and performance.

Overview

High-Strength Leaf Chain

This leaf chain is precision-engineered for heavy-duty lifting and pulling applications. Constructed from high-quality steel plates and pins, it ensures optimal durability and reliable power transmission. It is specifically designed to provide smooth operation in demanding environments such as forklifts, cranes, and various material handling equipment.

Technical Specifications

Construction Materials	Precision-engineered steel, Steel plates, Steel pins
-------------------------------	--

Applications

Suitable Applications

- Forklifts
- Cranes
- Heavy-duty lifting equipment
- Material handling systems

Performance

Key Performance Features

High-strength • Heavy-duty • Smooth operation • Reliable power transmission
