

Leaf Chain for Vertical Lifting Systems

This leaf chain is designed for sky stacker and vertical lifting applications. It is manufactured with high-quality materials to ensure durability, optimal power transmission and smooth operation.

Product Overview

High-Performance Vertical Lifting Solutions

This leaf chain is engineered specifically for sky stacker applications and vertical lifting systems. It features robust construction designed to handle heavy loads and demanding industrial operating conditions. Manufactured with high-quality materials, it ensures durability, longevity, and optimal power transmission for smooth, reliable operation.

Technical Specifications

Key Features

- High-strength construction
- Engineered for heavy loads
- Designed for demanding environments
- Optimized power transmission

Model Identifier	FH3226SDC
Primary Application	Vertical Lifting, Sky Stacker, Material Handling
