

Leather and Fabric Fingerless Gloves

These fingerless gloves are made with a leather palm for enhanced grip and a fabric back for breathability. An elasticated wrist closure ensures a secure and comfortable fit.

Product Overview

Professional Hand Protection

These fingerless gloves are engineered for tasks requiring maximum dexterity without sacrificing protection. Combining high-quality leather palms for superior grip with breathable fabric backs, they ensure long-term comfort during intensive use. Designed for professional environments, they feature an elasticated wrist and reinforced back panels for added durability.

Technical Specifications
