Product Overview

Dual-Function Illumination and Purification

This LED purification fixture is engineered to combine high-efficiency lighting with effective air purification capabilities. Designed for versatility, it features a durable aluminum frame and PC cover, making it suitable for residential, commercial, and industrial indoor environments. The fixture offers a sleek, low-profile design that ensures even light distribution while improving indoor air quality.

Technical Specifications

Input Voltage	165-265V
Materials	Aluminum Frame, PC Cover, Stainless Steel Clips
