

LED Bactericidal Grille Lamp with Remote Control

This LED bactericidal grille lamp is designed for effective sterilization and disinfection using ultraviolet light. A remote control offers convenient operation, allowing users to adjust settings and timers remotely.

Overview

Advanced Bactericidal Lighting Solution

This LED bactericidal grille lamp provides effective sterilization and disinfection capabilities using ultraviolet light technology. Designed for versatility, it is suitable for residential, commercial, and healthcare environments. The unit features energy-efficient LED components for long-lasting performance and includes a remote control for convenient timer adjustments and operational safety.

Technical Specifications

Lighting Technology	Ultraviolet (UV) Bactericidal LED
Control Interface	Remote Control
Design Features	Grille Design, UV-C Optimized, Energy Efficient

Operational Details

Suitable Applications

- Residential
- Commercial
- Healthcare

Timer Functionality	Yes
