Overview

High-Performance Balloon Lighting

This LED balloon flood tower light is engineered for demanding construction and emergency environments, featuring a durable nylon 66 shell for robust protection. Its unique balloon design delivers 360-degree, glare-free illumination, effectively minimizing shadows and enhancing safety across wide areas. Designed for versatility, it supports multiple mounting options including tripods, trolleys, or existing lighting towers, making it an ideal portable lighting solution.

Technical Specifications

Power Output

200 W Minimum Power	600 W Maximum Power
-------------------------------	-------------------------------

Input Voltage	AC120V, AC230V, DC24V
Luminous Efficacy	100 Lm/W
Average Lifespan	50000 hours

Features

Key Features

- 360-degree omnidirectional illumination
- Glare-free and flicker-free light output
- Durable nylon 66 shell construction
- Advanced thermal management design
- Compatible with dimming functionality

Mounting Compatibility

Tripod • Trolley • Lighting Tower

Driver Type

MW driver
