

LED Driver Power Supply

This LED driver power supply is designed for constant voltage LED lighting applications. It features an input voltage range of 100-240VAC at 50/60Hz and provides a 24VDC output at 2.5A.

Overview

Reliable LED Driver Power Supply

This high-performance LED driver power supply is engineered for versatility and durability in various lighting applications. Featuring a robust input voltage range of 100-240VAC, it is compatible with global power standards. With an IP67 protection rating, this unit is fully protected against dust and water immersion, making it an ideal choice for demanding outdoor installations.
