

LED Emergency and Indicator Light Bar

This emergency light and indicator light features a combination of blue and red LEDs for high visibility. It is designed for mounting on vehicles or other surfaces for emergency response or signaling purposes.

Product Overview

High-Visibility Emergency Signaling

This LED Emergency and Indicator Light Bar is engineered for superior visibility in critical response situations. Featuring a high-intensity matrix of red and blue LEDs, it ensures maximum attention-grabbing performance for emergency vehicles or signaling applications. The unit is built with a durable silver-colored frame and a central black housing, which is designed to accommodate additional equipment such as a camera or sensor.

Technical Specifications

Construction Materials

- Silver-colored frame
- Central black housing
- Grid-like center design

Primary Applications

Emergency Response • Signaling • Vehicle Mounting

LED Configuration

Red LEDs, Blue LEDs, Matrix Pattern

Mounting Capability

Yes
