

LED Emergency Warning Beacon

This LED beacon operates on DC12V and features a magnetic base for easy installation. Available in red, blue, amber, and clear, it offers multiple flash patterns and a waterproof, shakeproof design.

Product Overview

High-Intensity Emergency Warning Solution

The VS3-b LED beacon is a high-intensity warning light engineered for critical emergency and security applications. Featuring alternating red and blue LED modules, this unit provides comprehensive 360-degree visibility for maximum safety. Its robust construction includes an integrated finned heat sink for efficient thermal management, ensuring a long operational lifespan even in challenging environments.
