

LED Emergency Warning Light Bar

This high-intensity LED emergency light bar is designed for maximum visibility and long-lasting performance. It features multiple flash patterns and weather-resistant construction, suitable for emergency vehicles and construction equipment.

Product Overview

High-Intensity Warning Solution

This LED emergency warning light bar is engineered for maximum visibility and long-term durability in demanding environments. Designed for versatility, it features multi-pattern flash modes and a weather-resistant construction suitable for emergency vehicles and construction equipment. The unit supports dual-voltage operation and includes all necessary mounting hardware for straightforward installation.

Technical Specifications

Operating Voltage

12 V DC
Min Voltage

24 V DC
Max Voltage

Typical Applications

- Emergency Vehicles
- Construction Equipment
- Warning Signal Systems

Durability

Impact Resistant

Key Features

Multi-pattern Flash, Weather-resistant, High-Intensity LED

Installation

Mounting Hardware

Yes
