

LED Filament Light Bulb

This LED filament light bulb has a color temperature of 3000K and an average lifespan of 25000 hours. It has a voltage range of 220-265V and a lumen output of 810Lm.

Product Overview

High-Efficiency LED Filament Lighting

This LED filament light bulb combines classic aesthetics with modern energy-efficient technology. Designed for versatility, it offers multiple power options and color temperatures to suit various lighting environments. With an impressive 25,000-hour lifespan and significant energy savings, this bulb is an ideal solution for professional lighting applications.

Technical Specifications

Power Options

- 4W
- 6W
- 8W

Voltage Range	AC170-265V
Socket Compatibility	E27, B22

Performance Metrics

Performance Highlights

100 Lm/w
Luminous Efficacy

25000 h
Lifespan

Power Factor	0.5 >
IP Rating	IP20

Options

Available Color Temperatures

3000K • 4000K • 6500K
