

LED Filament Spiral Lamp

This energy-efficient LED spiral lamp is designed for general illumination purposes. Its spiral-shaped LED filament is enclosed in a clear housing and provides a wide beam angle with uniform light distribution.

SD-CL-FS

Product Overview

LED Filament Spiral Lamp

This LED spiral energy-saving lamp utilizes advanced semiconductor chip technology to provide efficient, uniform illumination. Designed for durability, the lamp features a robust construction that is resistant to vibration and breakage, ensuring a significantly longer service life compared to traditional bulbs. It is an ideal lighting solution for both residential and office environments.

Technical Details

Light Source	Semiconductor LED Chip
Durability Features	Vibration Resistant, Breakage Resistant, Long Service Life
Model ID	SD-CL-FS

Applications

Recommended Use

- Residential Lighting
- Office Spaces
