Product Overview

High-Efficiency Industrial LED Solution

This high-power LED bulb is engineered for demanding industrial and commercial lighting environments. Featuring an advanced integrated fin heat sink, it ensures superior thermal management for extended operational life. The frosted diffuser provides uniform light distribution, while the standard E26/E27 base allows for seamless integration into existing infrastructure.

Technical Specifications

Base Type	E26/E27
Cooling System	Integrated Fin Heat Sink, Passive Cooling
Light Distribution	Uniform (via Frosted Diffuser)

Key Features

Performance Highlights

1 High Energy Efficiency	1 High Lumen Output
------------------------------------	-------------------------------

Suitable Applications

- Industrial Lighting
- Commercial Facilities
- General Illumination
