

LED Flood Light 10-100W

This LED flood light has a wattage range of 10-100W and a color temperature of 6000K. It offers a 110-degree beam angle, a maximum luminous efficiency of 85Lm/W, and a 20,000-hour lifespan, suitable for landscape, street, and park applications.

Product Overview

High-Performance Outdoor Illumination

These floodlights are constructed from durable die-cast aluminum alloy, offering excellent corrosion resistance and superior heat dissipation for a long service life. Designed for versatility, they support a wide wattage range from 10W to 100W, making them suitable for various outdoor applications including landscapes, streets, parks, and security passages. With an energy-efficient design and a wide beam angle, they provide reliable, uniform lighting while remaining environmentally friendly.

Technical Specifications

Wattage Range	100 W
Color Temperature	6000 K
Beam Angle	110 degrees
Max Luminous Efficiency	85 Lm/W
Lifespan	20000 hours

Construction & Design

Key Features

- Corrosion resistant
- Excellent heat dissipation
- Eco-friendly design

Body Material	Die-cast aluminum alloy
Driver Technology	Non-isolation, DOB

Applications

Suitable Environments

Landscape • Street • Park • Safe Passage
