Product Overview

High-Efficiency Outdoor Illumination

This LED flood light is engineered with a durable, die-cast aluminum housing designed for longevity and resilience in outdoor environments. By integrating the driver and radiator into a single unit, the fixture achieves superior heat dissipation, significantly extending its operational lifespan. It offers versatile application potential, making it an ideal choice for warehouses, factories, stadiums, and general outdoor lighting needs.

Performance Metrics

Light Efficiency

130 lm/w

Light Efficiency
