Product Overview

High-Performance LED Sports Lighting

The FT Series 9743 is a robust and energy-efficient LED flood light engineered for high-intensity illumination in sports venues, gymnasiums, and large outdoor gardens. Available in multiple power configurations ranging from 150W to 1000W, this fixture combines professional-grade cooling with anti-glare technology to ensure optimal visual comfort for both athletes and spectators. Its waterproof design and exceptional color rendering make it a reliable choice for demanding professional environments.
