Product Overview

High-Performance LED Flood Lighting

This next-generation LED flood light is engineered for versatility and durability in large-scale outdoor environments. Featuring a lightweight, compact design with reduced wind resistance, it is ideal for stadiums, docks, and airports. The unit supports flexible installation with built-in or external power supply options and includes an adjustable mounting bracket for precise beam control.

Technical Specifications

Ingress Protection Rating

IP66

Dimming

Yes

Power Supply Configuration

Built-in, External

Design & Installation

Installation Features

- Adjustable mounting bracket
- Integrated handle
- Easy external wiring
- Equipped with hoists

Physical Advantages

- Lightweight construction
- Compact size
- Low wind resistance
- Modular LED panel design

Quality Assurance

Quality Testing

Smoke Test, Water Test, Packaging Vibration Test

Applications

Recommended Applications

- Stadiums and Sports Fields
- Docks and Ports
- Airports
- Parking Lots
- Architectural Lighting
