

LED In-Ground Light Fixture

This square LED in-ground light fixture has a stainless steel frame and a matrix of multi-colored LEDs. It is suitable for outdoor applications, providing ambient or accent lighting in landscape or architectural settings.

Product Overview

Professional LED In-Ground Lighting

This square LED in-ground light fixture is engineered for robust outdoor performance, featuring a durable stainless steel frame. Designed for flush mounting in walkways, patios, and decks, it provides versatile ambient or accent lighting for architectural and landscape settings. Its resilient construction and aesthetic design make it an ideal choice for enhancing safety and visual appeal in various environments, including food and beverage processing areas.

Technical Specifications

Fixture Shape	Square
Frame Material	Stainless Steel
Installation	Flush-mount
Lighting Type	Multi-colored LED Matrix

Applications

Core Benefits

- Durable construction for outdoor environments
- Flush-mount design for seamless integration
- Versatile ambient and accent lighting
- Suitable for safety and aesthetic enhancement

Use Cases

Landscape Lighting, Architectural Lighting, Walkways, Patios, Decks, Food & Beverage Facilities
