Overview

Reliable Industrial Signaling

This LED indicator light is a compact, energy-efficient signaling device designed for industrial and commercial applications. It provides clear visual feedback for equipment status, process conditions, or alarm states. Built for demanding environments, it ensures reliable performance and longevity in control panels and automation systems.

Electrical Specifications

Rated Voltage	220 V
Rated Current	20 mA
Input Type	AC

Compliance & Standards

Compliance Standards

- IEC60947-1
- IEC60947-5-1

Certifications	CE
