

LED Indicator Socket Outlet

This socket outlet features LED indicator lights for visual feedback. It has a rounded corner design and a circular button.

Product Overview

Professional LED Indicator Socket Outlet

The ME50B socket and outlet features a modern design with integrated LED status indicators, providing clear visual feedback on operational state. Its rounded aesthetic and functional front-panel layout make it an ideal choice for high-end power distribution or networking environments. This component is engineered for reliability, combining modern visual cues with robust build quality for professional applications.
