Product Overview

High-Performance Solar Street Lighting

This integrated solar street light is engineered for durability and reliability in diverse outdoor environments. Utilizing advanced aluminum die-molding, the lamp body offers superior corrosion resistance and thermal conductivity. With intelligent IOT management for remote diagnostics, it provides a low-maintenance, efficient solution for street and road illumination.

Technical Specifications

Available Power Ratings	100W, 120W, 150W
Lighting Distribution	Wide bat-wing light distribution for larger lighting area
Rainy Day Autonomy	7 days

Construction & Durability

Body Material	High thermal conductivity die-casted aluminum alloy
Hardware	Stainless steel hexagon lock screws

Smart Features

Remote Functions

- Remote control
- Remote diagnostics

Management System	Yes
-------------------	-----

Quality Assurance

Quality Testing

- Aging tested
- Corrosion resistance verified
