

LED Lamp Cup for Directional Lighting

This LED lamp cup is designed for efficient and directional lighting. Its multiple LED emitters enhance brightness and create a focused beam.

Product Overview

High-Performance Directional Lighting

This LED lamp cup is engineered for efficient and precise directional lighting, making it an ideal choice for accent, display, and task lighting applications. It features multiple LED emitters designed to deliver enhanced brightness and a focused beam pattern. Built with durable materials, the unit ensures long-lasting performance and effective heat dissipation for reliable operation.

Technical Specifications

Installation	Standard lamp socket compatible
Key Features	Directional Lighting, High Brightness, Focused Beam, Heat Dissipation

Applications

Suitable Applications

- Accent lighting
- Display lighting
- Task lighting
