

LED Landscape Floodlight

This LED floodlight is designed for outdoor applications such as illuminating grass areas and landscapes. It provides bright, uniform illumination with energy-saving LED technology.

Overview

High-Performance Landscape Illumination

This LED landscape floodlight series is engineered for professional outdoor applications, providing bright and uniform illumination for grass areas and architectural landscapes. Built with a durable, weather-resistant housing, it ensures reliable performance in diverse environmental conditions. Its energy-efficient LED technology makes it an ideal choice for large-scale telecommunication engineering projects and international infrastructure contracts.

Technical Details

Key Features

- Energy-saving LED technology
- Weather-resistant construction
- Adjustable mounting bracket
- Durable housing

Patent Certification

ZL201930615638.2

Suitable Applications

Landscape Lighting, Grass Areas, Telecommunication Engineering, Outdoor Infrastructure
