

LED Lighting Strips

These LED lighting strips are designed for use in telecommunication and electronic equipment. They provide bright and evenly distributed light in various colors, suitable for signaling and indication.

Product Overview

Versatile LED Lighting Solution

These professional-grade LED lighting strips are designed for precision signaling, indication, and decorative illumination in various electronic and telecommunication environments. Featuring high-intensity output, the strips are available in distinct colors including blue, green, and red to suit specific operational requirements. Their compact and durable design ensures reliable performance when integrated into complex telecommunication or electronic equipment.

Technical Specifications

Primary Applications

- Telecommunication signaling
- Electronic equipment indication
- Decorative hardware illumination

Light Distribution

High Intensity • Even Distribution

Available Colors

Blue, Green, Red
